

I plan to manage my time for this online asynchronous course by dedicating specific time slots each week. I'll allocate 3 hours midweek to watch the video lectures, ensuring I grasp the material.

On Saturdays, I'll set aside 30 minutes to complete the weekly quiz.

Fridays will be reserved for tackling the problem sets, which I estimate will take 4-5 hours.

Additionally, I'll spread out the remaining 4-5 hours over the week for studying and reviewing course materials to stay on track and fully understand the content.
